24 International Wood Machining Seminar

August 25-30, 2019

IWMS-24 Proceedings

Oregon State University Corvallis, Oregon, USA

Editor: Gary S. Schajer, IWMS International Advisory Committee

Welcome to IWMS-24 !

We, Eric Hansen and Scott Leavengood at Oregon State University and Darrell Wong at FPInnovations, Vancouver, Canada, are proud to be your hosts and to welcome you warmly to the 24th International Wood Machining Seminar. In 2017, the then Dean of the College of Forestry at OSU, Thomas Maness, agreed to host this event. He had been closely involved in the organization of the 13th IWMS held in Vancouver. Unfortunately, Thomas passed away last year, but I know that he would certainly have been excited and proud to welcome you to OSU's College of Forestry. You will get to tour and experience the Red Emmerson Advanced Wood Products Laboratory and see the ongoing construction of the new Peavy Hall, both buildings utilizing mass timber. These new additions to the College are a key part of Thomas' legacy. We have a great week planned for you, with plenty of technical content, much opportunity for great social interaction with friends, and for Post-Seminar Tour participants, the experience of our local industry. We much look forward to welcoming you on campus.

With good wishes,

Eric Hansen and Scott LeavengoodDarrell WongOregon State UniversityFPInnovations

Preface

This is the 24th meeting of a series started in 1963 at the University of California, Richmond, originally named as the Wood Machining Seminar. In the early days, the meetings were based solely in Richmond, were of modest size, and were specialized solely on wood machining. For the 9th and subsequent meetings, the increasing success of the Seminars gave confidence to expand the scope of the discussions to encompass all aspects of wood processing and also to diversify the meeting sites to various centers of wood processing research around the world. This required a name change and thus the International Wood Machining Seminars were born. Since then, IWMS meetings have been held in nine different countries, always with strong attendance and with increasing diversity.

A central and distinctive feature of the IWMS meetings is the strong feeling of community among the participants, with numerous regulars of many years standing. Thus, in addition to being a high-level technical meeting, IWMS is also a gathering of both old and newly formed friends. Strong personal relationships and collaborations are both born and strengthened. New participants, particularly those at the start of their careers are warmly welcomed. In this way, the foundations developed by the established generation can be passed on to the new generation for them to build on and add their own contributions. It is the hope that they in turn will become regular IWMS participants and encourage the following generation. This was the dream of the original founders.

Welcome to IMWS-24, welcome to the technical sessions, but most particularly, welcome to the IWMS community.

With best wishes,

Gr S. Schafer

Gary S. Schajer Chair, IWMS International Advisory Committee

Table of Contents

Oral Presentations

Keynote	
History of the International Wood Machining Seminars	1
Ryszard Szymani	
Wood Machining	
Single Tooth Cutting Forces in Green Norway Spruce: Experimental Results	9
Mats Ekevad, Micael Öhman, Xiaolei Guo	
Developments in Circular Saw Guide Pad Design	23
Bruce Lehmann, Ahmad Mohammadpanah	
Critical Temperature of Circular Saws	31
Ahmad Mohammadpanah, Bruce Lehmann	
Effect of Saw Material Properties on Guided Circular Saw Cutting Accuracy Warren Bird	41
Effect on Sawing Accuracy of the Lamella Position in a Sash Gang Saw K.A. Orlowski, D. Chuchala, J. Sandak	47
Specific Cutting Coefficients at Different Grain Orientations Determined During Real Machining Operations	53
R. Curti, B. Marcon, R. Furferi, L. Denaud, G. Goli	
Increasing the Stability of Thin Circular Saw Blades	63
by Reduction of the Radial Stiffness	
W. Szyszkowski and S. Szyszkowski	
Effect of Radial Force on Ring Debarker Efficiency with Frozen Logs Wassim Kharrat, Roger Hernández, Claudia B. Cáceres, Carl Blais	71
<u>Relationships Between Chip Formation in Orthogonal Cutting of Hinoki</u> and Strain Near Cutting Edge	81
Yosuke Matsuda, Yuko Fujiwara, Yoshihisa Fujii	

Novel Test Method Enabling Detailed Analysis of Wood Cutting Processes	
S. Frybort, O. Dvořáček, T. Krenke, F. Haa	
Effect of Gullet Geometry on Circular Saw Noise Emission	
D. Fendeleur	
Vibration of Guided Circular Saws	
S. G. Hutton, A. Mohammadpanah	
asors and Quality Control	
Linear Scanning Device for Wood Grain Direction Measurement	
Qi Pan, Gary S. Schajer	
Vision System for On-line Monitoring of Wood Surface Roughness	
J. Sandak, K. Orlowski, A. Sandak, D. Chuchala, P. Taube	
Accusto ultraconic Evolution of Carbida Sour Tin Integrity	
Acousto-unrasonic Evaluation of Carolide Saw Tip Integrity	
John Schultz and Richard L. Lemaster vel Products and Production Processes	
John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm	
John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber:	
John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes	
John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes Linus Olofsson, Olof Broman, Dick Sandberg	
Acousto-unrasonic Evaluation of Carolice Saw Tip Integrity John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes Linus Olofsson, Olof Broman, Dick Sandberg Energy Efficient and Controlled Narrow Surface Coating Process	
Acousto-ultrasonic Evaluation of Caroide Saw Tip Integrity John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes Linus Olofsson, Olof Broman, Dick Sandberg Energy Efficient and Controlled Narrow Surface Coating Process with Multi-layer Ceramic Materials	
Acousto-utrasonic Evaluation of Carolde Saw Tip Integrity John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes Linus Olofsson, Olof Broman, Dick Sandberg Energy Efficient and Controlled Narrow Surface Coating Process with Multi-layer Ceramic Materials M. Herzberg, A. Wagenführ	
Activity of the Evaluation of Catolice Saw Tip Integrity John Schultz and Richard L. Lemaster vel Products and Production Processes Geometric Dimensioning and Tolerancing of Furniture Components A. Riegel, C. Kortüm Holistic-Subjective Automatic Grading of Sawn Timber: Sensitivity to Systematic Changes Linus Olofsson, Olof Broman, Dick Sandberg Energy Efficient and Controlled Narrow Surface Coating Process with Multi-layer Ceramic Materials M. Herzberg, A. Wagenführ Micro-focus X-ray CT Observation of Pinholes Incised by Laser and Drill
